GARLWAY MACHINERY

COMPANY PROFILE

>>> About Us

Henan Garlway Machinery Co., Ltd., established in 2014 and headquartered in Zhengzhou City, Henan Province, is a leading manufacturer specializing in the research, development, production, and sales of mechanical equipment. As our core product, winches are at the heart of our operations, alongside other offerings such as concrete mixers, batching machines, and mixing stations. With over a decade of industry expertise, we pride ourselves on our robust R&D capabilities, enabling us to deliver customized solutions tailored to diverse customer needs. Our three factories, spanning 60,000 square meters, and a dedicated workforce of over 300 employees ensure a monthly production capacity of 2,000 units. Serving markets across Southeast Asia, Central Asia, North Africa, South Africa, Latin America, and Oceania, Garlway Machinery has earned global recognition for its high-quality products and exceptional service. Committed to innovation and excellence, we strive to strengthen our position as a leader in the mechanical equipment industry, promoting Chinese products worldwide.

Js500 Electric Cement Concrete Mixer For Sale

Item Number: JS500

Introduction

Electric cement mixer for construction: high-efficiency, durable, and versatile. Achieve uniform mixing with advanced twin-shaft technology. Certified quality.

[Learn More](#)

Parameter	Details
Mixer Type	Twin shaft horizontal forced type
Mixing Capability	Dry hard concrete, plastic concrete, flowing concrete, light weight aggregate concrete, various mortar
Application	High-efficiency machine with wide application
Compatibility	Can work solely or form simple concrete mixing plant with PLD series batching machine, mixer for HZS25 concrete batching plant
Mixing Evenness	High
Mixing Time	Short
Reliability	High with least break down
Life Span of Wearing Parts	Long
Operation and Maintenance	Easy
Discharge Type	Hydraulic discharge, Manual discharging for options
Discharge Door Angle	Adjustable
Plates and Blades Material	High wear-resistant chromium-manganese alloys
Shaft End Sealing System	Multi-sealing structure, effectively prevents leakage
Motor and Speed Reducer	China famous brand, Full copper motors, Stable and long life
Steel Standard	National Standard Steel from China famous steel & iron companies
Discharge Height	1.5m, 3.8m optional
Performance	Excellent with 11 tech patents
Certification	China Well-known Trademark, ISO SGS

Skid Steer Self Loading Concrete Mixers For Construction

Item Number: JS750

Introduction

Discover high-efficiency concrete mixers for construction projects. Durable, versatile, and easy to operate. Boost productivity now!

[Learn More](#)

Parameter	Value
Discharge capacity	750L
Feeding capacity	1200L
Productivity	30-35m ³ /h
Total motor power	30kW (mixing) + 7.5kW (winch)
Aggregate particle size	≤80mm (crushed stone)
Discharge height	1.6m/2.7m/3.8m (optional)

Js1000 Volumetric Concrete Mortar Mixer For Sale Skid Steer Cement Mixer

Item Number: JS1000

Introduction

Discover the JS1000 volumetric concrete mixer, ideal for building, road, and hydropower projects. High efficiency, reliable performance, and easy maintenance ensure consistent, quality concrete.

[Learn More](#)

Parameter	Details
Model	JS1000
Applications	General building construction, Road and bridge construction, Water conservancy and hydropower projects, Prefabricated components production
Mixing Efficiency	High, Double horizontal shaft forced mixing principle, Theoretical material output per hour can reach a high level
Mixing Quality	Good, Optimized angle and shape of mixing blades, Complex convection and shear movement in the cylinder, Well homogenized concrete with less discrete strength
Reliability	Strong, High-quality brand components for motor and reducer, Carefully designed and optimized transmission system, Stable operation for long durations, Reduced breakdown and downtime
Operation and Maintenance	Convenient, Humanized operation panel, Simple and easy to understand operation, Easy start, Designed for easy inspection, repair, and maintenance, Large overhaul space for components
Application Range	Wide, Adjustable parameters for mixing time, rotating speed, and material proportion, Suitable for different types of concrete such as ordinary, high-strength, and fiber concrete

Harbor Freight Js1500 On Site Concrete Mixing Volumetric Cement Mixer

Item Number: JS1500

Introduction

Discover the JS1500 harbor freight cement mixer for large-scale construction and hydraulic projects. High-capacity, efficient, and eco-friendly.

[Learn More](#)

Parameter	Specification
Model	JS1500
Type	Forced Concrete Mixer
Discharging Capacity	1.5 cubic meters
Mixing Performance	Double horizontal shaft forced mixing
Measuring System	High-precision measuring device
Material Construction	High-strength steel (mixing cylinder & blades)
Environmental Features	Dust collection and sewage treatment system
Applications	Large-scale construction, infrastructure, hydraulic engineering, commercial concrete mixing plants
Key Selling Points	Large-capacity mixing, high-efficiency performance, precise measuring, sturdy design, environmental protection

Belle Cement Mixer Js2000 Volumetric Concrete Mixer For Harbor Freight

Item Number: JS2000

Introduction

Discover the Belle cement mixer for high-quality concrete production. Ideal for large-scale construction, transportation, and energy projects. Reliable, precise, and easy to maintain.

[Learn More](#)

Parameter	Description
Model	JS2000
Discharging Capacity	2 cubic meters
Mixing Mode	Double horizontal shaft forced mixing
Mixing Quality	High uniformity, high strength, and stability
Key Components	High-strength wear-resistant mixing blades, stable reducer
Control System	Advanced electronic measuring system
Measuring Precision	High precision for various materials
Operation Interface	Humanized, simple, and intuitive
Maintenance	Easy access to components, low maintenance cost
Applications	Large-scale construction, transportation, energy and chemical, water conservancy
Selling Points	Powerful mixing capacity, excellent mixing quality, high reliability, precise control, convenient operation and maintenance

Belle Mixer Drum Self Loading Mortar Mixers Js3000

Item Number: JS3000

Introduction

JS3000 concrete mixer: High-capacity, efficient mixing for large-scale construction projects. Reliable, durable, and eco-friendly. Boost productivity now!

[Learn More](#)

Applications	Description
Ultra-large construction projects	Provides efficient and stable concrete supply for skyscrapers over 600 meters, large commercial complexes, and industrial plants. Meets demands for foundation and main structure concrete pouring.
Large infrastructure projects	Used in cross-sea bridges, high-speed railroads, and urban subway networks. Mixes high-performance, high-strength concrete for bridge main towers, railroad track slabs, and other structural components.
Large-scale water conservancy projects	Mixes concrete with excellent seepage and freeze-thaw resistance for dams, spillways, and other hydraulic structures in hydropower stations and water transfer projects.
Commercial concrete production base	Serves as core equipment for large-scale commercial concrete production, providing various grades and performance requirements for urban and neighboring construction projects.
Selling Points	Description
Extra large mixing capacity	Discharging capacity up to 3 cubic meters, high hourly output, reduces mixing batches, improves production efficiency, and meets large concrete demands.
High-efficiency mixing technology	Uses double horizontal shaft forced mixing technology and optimized blade/cylinder design for strong three-dimensional mixing flow, ensuring uniform and high-quality concrete.
Advanced control system	Equipped with high-precision intelligent control for precise material measurement, automated mixing, stable concrete quality, improved efficiency, and reduced labor costs.
High abrasion resistance and durability	Key components made of high-strength, abrasion-resistant alloy materials with special heat treatment, ensuring long service life and adaptability to high-intensity operations.
Environmental protection and energy-saving	Includes efficient dust collection and wastewater recycling systems, reduces dust emissions and water waste, optimizes motor power and transmission for energy-efficient production.

Garlway Machinery

No.55 Zhongxin Road, Shangjie District, Zhengzhou
City, Henan Province, China.
